

Section 12. Some of our CSR (Corporate Social Responsibility) projects

As foreigners, we have to remember that we are guests within this community, and as such, we need to work together to provide support and bring about positive change. With such a large investment coming into the community, many direct and indirect good jobs will be created, increasing the income levels for many families and helping with wider socioeconomic development. However, we must not stop there; we can still do much more to help our wonderful community. Listed below are just a few of the projects we have already undertaken.

Building a Volleyball court for our local community in Newburgh

Refurbishing the Royal Newburgh Sports Club

Painting a local orphanage and supplying new mattresses to an orphanage near Bandarawela

Digging and installing a water well, pump, pipeline and tank system for a local Primary school

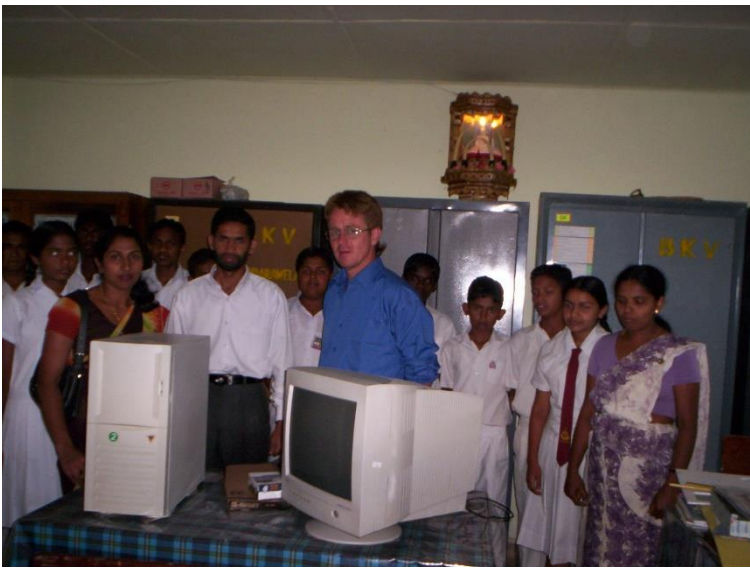

Landscaping for school playgrounds

Our men working hard to put a fire out in the forest below Ravana waterfall

Supplying computers to several schools around the Ella District

Once we get the hotel up and running, it is our wish to undertake many more good works within our local community
